

BRASS DECOR
Out Performs, Out Shines, Out Lasts

Handles - everything.

*"Quality is never an accident,
it is the result of intention, innovation and skillful execution."*

STAINLESS STEEL BALL BEARING
Promotes smooth friction free operation,
durability and mechanical longevity and a
10 Year Mechanical Warranty

4 Hour Fire Rating
Ball Bearing Mechanism is tested in
Australia for Australian standards

LONG TERM CONFIDENCE
Our mechanical quality difference
provides peace of mind, confidence and
long term durability.

The invisible hero of durable, reliable, friction free mechanical operation.

The Stainless Steel ball bearing promotes smooth mechanical operation, durability and longevity.

The Ball Bearing patented mechanism is accompanied by a four hour fire rating (Australian Standard # AS1530.4-1997 and BS476.)

SuperSafe High Security Entrance Locks

The newly designed Supersafe High Security Entrance Lock is packed with features that you will not see in any other locks on the market. The new and improved mechanism is clean and engineered for simplicity ensuring a **7 YEAR MECHANICAL WARRANTY**.

Apart from the new durable heavy duty steel casing, the new Supersafe High Security Entrance Lock has a full sized locking bolt made from one piece of solid brass. The advantage of a full length solid bolt makes it virtually impossible for a burglar to force their entry by ramming the lock. The door jamb or the door itself will break before the solid bolt and steel case give way!

With a positive "flick" action single throw to lock/unlock the door, the bolt extends 24mm (9001) from the face of the lock so you can rest assured that your most valuable possessions are superSAFE and secure.

Polished Brass	50 x 65 x 1.5
5035 Small Cabinet Hinge	35 x 63 x 1

Hinges

All stainless steel hinges are manufactured using high grade 304 or 316 stainless steel or solid virgin brass. The use of high quality raw materials provides consistent thickness without indentation or scratches, resulting in matching knuckles and square edges that fit flush with the jamb cut out. This quality and precision in manufacturing ensures a smooth effortless operation for all residential or commercial applications.

316 Stainless Steel - Marine Grade

316 S/Steel hinges are ideal for coastal, chlorinated or harsh external environments. 316 SS material is considerably more durable and much less prone to rust and corrosion than most other material alloys because of its high nickel content which provides intrinsic hardness and long term durability.

General Purpose

Item code	Finish	Length x Width x Thickness	Pin Type
45316	Satin	100 x 75 x 2.5	Fixed Pin
45318	Satin	100 x 75 x 2.5	Loose Pin
45317	Satin	100 x 100 x 2.5	Fixed Pin

It may look the same on the outside but what's on the inside really matters.

316 STAINLESS STEEL HINGES
ANYTHING ELSE IS A COMPROMISE!

304 Stainless Steel - High Grade Commercial

All hinges are supplied with wood screws included. Metal thread M5/12mm are available in packs of 8 to suit selected SS hinges (#9900)

Superior Brass (est. 1982) is a quality conscious company that has continuously invested in research and development which is the corner stone behind the release of many award winning products that are covered by international patents. This model of business practice has created a corporate culture that has built Superior Brass a formidable reputation as leaders in the Australian builders hardware market.

Superior Brass's corporate ethos is all about taking the initiative to release products which revolve around the customer's requirements and the 'Critical 4': **Functionality, Durability, Aesthetic Design and Affordability.**

A combination of Australian and European designers have focused on creating innovative products that are unique and exclusive to Superior Brass. Quality conscious hardware buyers have enabled Superior Brass to be the first to introduce (1995) the now popular PVD anti-tarnish brass finish range of door furniture. Superior Brass has pioneered many such innovations and has always provided consumers with the choice to take advantage of the latest technologies science has to offer, the choice of a comprehensive range of styles from which to choose and a variety of popular finishes.

With the combination of state of the art Italian CNC machinery and an emphasis on using quality raw materials, the finished product becomes an expression of excellence.

Superior Brass is committed to providing the hardware industry with high quality and durable products, covering the widest range of architectural styles.

Handles - everything.
